Learning objectives:

In this techniques class you'll learn to sew no-pin curves in different sizes using Jenny's Complete and Long Oval Drunkard's Path templates. The different sized curves are assembled and cut into wedges that, joined together, create a kaleidoscope style flower with either six or four petals. Jenny will show you how to get accurate angles on your wedges and how to get the seams to match. As usual there will be lots of ideas on how to make your own version and how to best use the different sized blocks and the wedges in your own design.

Jenny will show you how she chooses colours and how different colour values will help enhance the 'folds' in the petals.

You will be using the Complete and Long Oval Drunkard's Path template sets in this class. The paper version of the templates is included however, if you decide only the acrylic templates will suffice, you'll receive a 10% class discount code upon booking the workshop. The acrylic templates are highly recommended for ease and accuracy, especially if you are a stickler for precision.

Included:

- The use of a Janome sewing machine for the day
- PDF paper templates
- The Four Petalled Hexibore Quilt pdf pattern
- The Six Petalled Hexibore Quilt pdf pattern
