Work Sheet 14

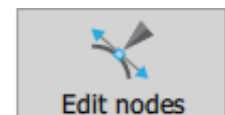

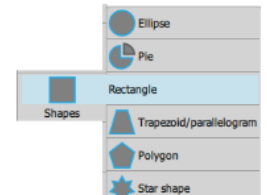

Using the Shapes Tool

Draw a Square or Rectangle shape.

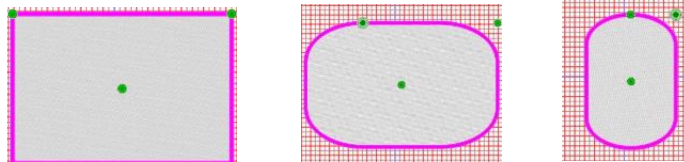

From the Left side Tool Bar select “Shapes”, choose “Rectangle” and draw your shape onto your page, any Shape Square or Rectangle is okay.

We are going to work with the Node Tools.

Please select your Shape “Selection Tool”, “Edit Nodes”

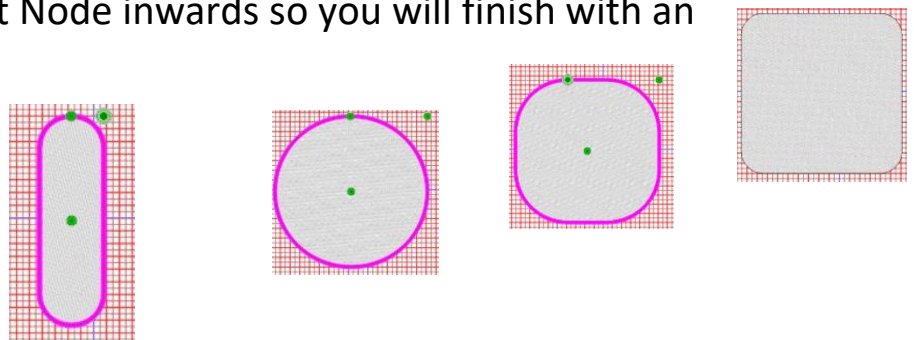

This is how you should be able to see your Shape with Round Nodes placed in Green. Click and hold down your Left mouse button on the top Left Corner, whilst still holding it down Drag your mouse inwards, you will notice that your Shape starts to change.

Now we will select the Round Node at the top Right and Drag it inwards.

Draw a Square, Drag the Left Node inwards so you will finish with an exact Circle.

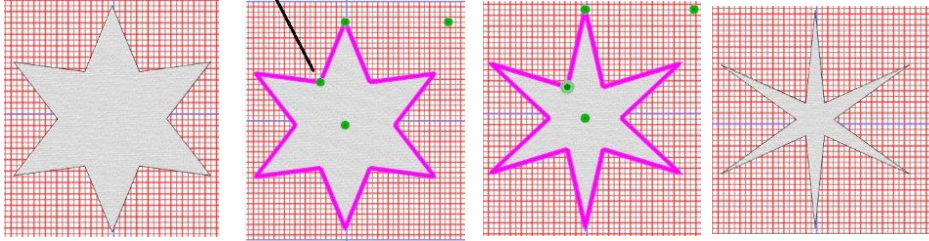

Now Drag the Right Node Inwards, this is a Free Reshape Node.

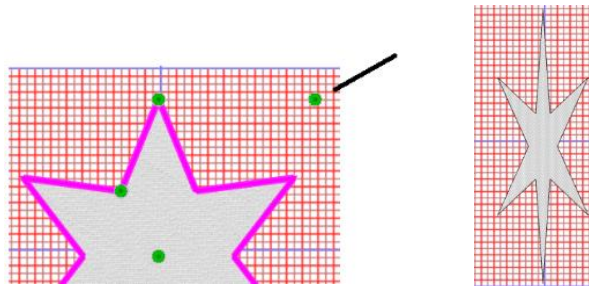

Go ahead... get creative!

Next, we will work with the Star Shape. Draw a Star Shape, Holding Control will create precise Shapes.

Click down your Left mouse Button on the Node as shown with the Arrow below and Drag inwards again

Now Drag the Right Node inwards, this is a Free Reshape Node and can be Dragged to almost any Shape of Star.

Go ahead... get creative!
